A good helper to keep your air clean and fresh!

This product utilizes nano-scale silver, Zinc oxide, negative ions, and other compounds to create an air filter that has the antibacterial, antifungal, and deodorization effects. Installing one filter can turn your air conditioner also into an air cleaner system.

Reports from Negative Ion Testing Machine model COM-3010PRO of TTRI (Taiwan Textile Research Institute) reveal that this product has adequate antibacterial and deodorization effects.
